PROFESSIONAL SUMMARY

BCA (Artificial Intelligence & Machine Learning) student with hands-on backend development experience building automation bots, REST APIs, and full-stack applications using Node.js and Express. Skilled in designing plugin-based architectures, integrating databases, and deploying containerized applications. Strong problem-solving ability with a track record of independently shipping and maintaining production-style projects. Seeking a Backend Developer / Node.js Developer role to apply automation, API development, and AI/ML coursework to real-world systems.

TECHNICAL SKILLS

Languages & Runtimes: JavaScript, Node.js

Frameworks & Libraries: Express.js, Telegraf, Baileys

APIs: REST API Design, API Integration

Databases: MongoDB, Mongoose

DevOps & Tools: Docker, Git, GitHub, Cloud Deployment

Web: HTML, CSS

Domain Interest: Artificial Intelligence & Machine Learning

SOFT SKILLS

Problem Solving | Teamwork | Communication | Quick Learner | Time Management | Adaptability

WORK EXPERIENCE

Backend Developer — WhatsApp Automation Bot (Personal Project)

2025 – Present

- Engineered a WhatsApp automation bot in Node.js using the Baileys library, building a plugin-based command architecture to support ongoing feature expansion.
- Designed and developed REST APIs for media downloading and automation workflows, enabling reliable integration with bot commands.
- Integrated MongoDB with Mongoose to manage persistent data storage and session handling, improving reliability over file-based approaches.
- Containerized the application with Docker and deployed it to cloud hosting infrastructure, ensuring consistent and repeatable deployments.
- Built and maintained a modular plugin system, allowing new automation features to be added without disrupting core functionality.

Backend Developer — Telegram Automation Bot (Personal Project)

2025 – Present

- Developed a Telegram automation bot in JavaScript/Node.js using the Telegraf framework, implementing a custom plugin registry for scalable command management.
- Built and shipped multiple utility and automation commands, extending bot functionality for end users.
- Refactored code structure and optimized performance, improving maintainability and reducing response latency.

EDUCATION

Bachelor of Computer Applications (BCA) — Artificial Intelligence & Machine Learning

Koshys Group of Institutions | 2025 – Expected 2028

Higher Secondary Education (HSE), Kerala State Board

Padanilam HSS, Nooranad | 2025

CERTIFICATIONS

- Digital Edge 101 — Gold, 94% | FutureSkills Prime, NASSCOM & Ministry of Electronics and Information Technology, Government of India
